You can use Gloria 3 as a tone generator to play a MIDI stream without installing any files. This is useful to hear how the music will sound on Gloria before finalizing the MIDI files.
You need a MIDI playing app or MIDI notation program, such as Sibelius.

A useful MIDI file player is vanBacos Karaoke.
http://vanbasco-karaoke-player.en.softonic.com

Using the Gloria 3 streaming MIDI feature

1. Turn on Gloria, and connect the USB cable to your PC.
   The LCD screen should show "**USB Connected. / Speaker OFF**"
2. Press the (#) key to set **Speaker ON**.
3. Open the MIDI app.
4. Open the app's Setup menu and select **Output Device: Digital Orchestra**
5. Select **Play** on the app. The only control on Gloria that will function is the Volume Control.
